

FOR IMMEDIATE RELEASE:

Think Biosolution launches closed beta at Web Summit

Think Biosolution is a pioneer in smartphone camera based health analytics.

It is designing smartphone applications to compute heart rate, respiratory rate, blood flow, and blood oxygen using patent-pending technologies.

Think Biosolution co-founder Shourjya Sanyal presented at TedX Tallaght, on the domain of smartphone based diagnostics, to huge applause.

Co-founder Koushik Kumar Nundy presented a prototype application to measure biological signals using cameras at Startup Weekend Delhi, and went on to win the sam, beating 50 odd other pitches.

Think Biosolution is launching a closed beta of its first product PulseR at Web Summit, Dublin.

Think Biosolution co-founder Shourjya Sanyal at TedX Tallaght.
